

Shaggy has inherited, in his own words, "Zoinks! Like a billion dollars" from his beloved, super rich (and now missing) inventor uncle, Dr. Albert Shaggleford. Suddenly, Scooby and Shaggy go from not having enough cash to get breakfast to being able to hire their own personal chef.

Scooby and Shaggy promptly move into Uncle Albert's mansion and head to the entertainment center to eat, kick back, watch a little TV...and eat some more. While struggling to gain even a limited mastery over the huge pile of remote controls, they soon discover that one of the remotes opens a secret wall panel that leads down a dark flight of stairs to Shaggy's uncle's lab and, as it turns out...to Shaggy and Scooby's new destiny.

Once inside the lab, Scooby and Shaggy are wowed by an array of amazing inventions left behind by Uncle Albert. A message explains that he recently created a new, super top-secret invention. According to the message, bad guys are out to steal the nanotechnology at all costs.

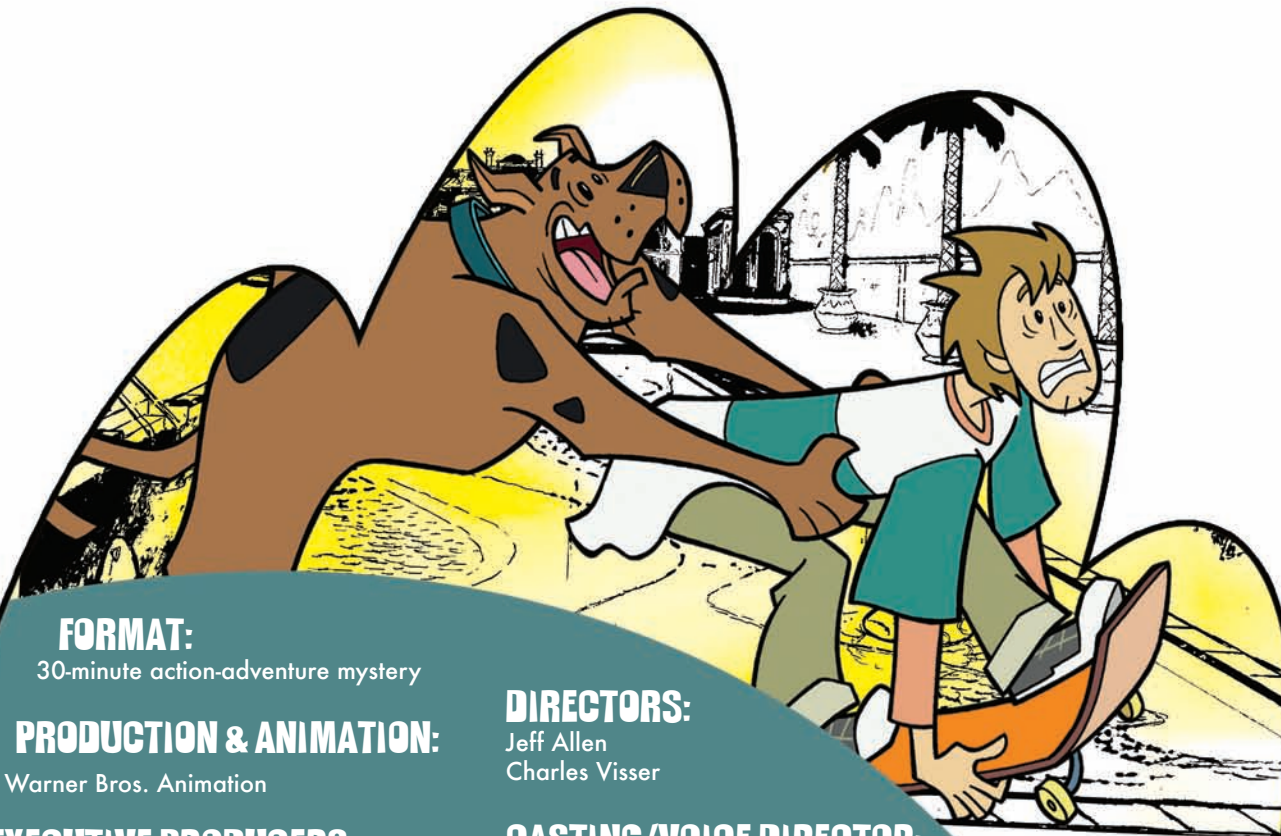

As the technology (hidden cleverly somewhere in the lab) would be incredibly dangerous in the hands of the wrong people, the message asks Scooby and Shaggy to use their mystery-solving skills to take down the bad guys and protect the nanotechnology formula.

Scooby and Shaggy have it all! A personal robot butler (ro-butler) named Robi, a mansion with an internal Smart House Computer and a new a high-tech Mystery Machine that can transform into anything they want.

This new technology is cleverly hidden in the form of "Scooby Snacks." When Scooby ingests a snack, he has all the powers one can imagine—invisibility, super strength, flight, x-ray vision, super speed and more, all of which work until Scooby digests his snack and BURPS. But it's not all smooth sailing—surprises and unpredictability arise while Shaggy & Scooby learn to harness these powers as they come. Be that as it may, armed with this new "bag of tricks," Scooby and Shaggy decide to venture out into the world of supervillains, international intrigue and mystery, to discover what became of Shaggy's uncle and to bring down the villains who are after his invention.

But it won't be easy, because Scooby and Shaggy are up against one extraordinary villain: the evil Dr. Phineus Phibes.

FACT SHEET

SCOOBY-DOO & SHAGGY

In many ways, Scooby-Doo and Shaggy are exactly the same characters they've always been—which means food is still their number-one priority. They are more like brothers than owner and dog—100% devoted to each other.
